

# Tell your story with Care Opinion Australia

Independent • Anonymous • Transparent

A story is a brief account of a care experience.

Say: Tell me what happened...

Say: Where did you receive care?

What did you feel went well?

Say: What did you think could be improved?

How did it make you feel?

What is your story about? ?

A trip to the ED

What happened? How did you feel? ?

I recently had a bad fall down my back steps and broke my arm. My husband drove me to the Emergency Department at Example Hospital. Triage took a little longer than expected, but it was a busy ED and I could see the staff were doing their absolute best.

Even though I had to wait a while, the nurse Sandra comforted me and made me feel cared for while I awaited my x-ray. Her kindness really helped keep me calm and I wanted to say thank you.
